

## GATEWAY DALI/CASAMBI

### DALI/CASAMBI GATEWAY

DALI/Casambi gateway: a fixture that allows fixtures equipped with mesh Bluetooth Casambi to interface with a traditional DALI system and to be adjusted by a DALI control unit.

Inside the usual DALI circuit it is possible to have a maximum of 64 cabled DALI and Casambi wireless devices.

It only works with Casambi Evolution networks.

The DALI Bridge is transparent in the DALI system, and therefore does not require an address.

There is no need for a power supply given that it is supplied directly by the DALI bus. Power supply from DALI Bus.

DALI Bus max current: 250 mA.

9,5-22,5  
Vdc

### Characteristic data

Input	9,5-22,5 Vdc				
-------	--------------	--	--	--	--

### Dimensional characteristics
