

## EXTRA NARROW DURAstrip IP65

The EXTRA NARROW series is a concentrate of quality materials that is shared with other DURASTrip: high quality choices to ensure a professional level performance, excellent heat dissipation and long duration, Ra >90. EXTRA NARROW is the range with the smallest substrate in the entire collection. Just 5 mm or 6 mm wide, it solves all needs not only connected to confined spaces but above all, for characteristic lighting design. To be used with thin section profiles in the range. The type of LED source used and the short LEDs' center to center distance eliminate the dot effect also in profiles with lenses that are very close to the base.
